Defect marking places marks on a web at a position relative to a defect or process upset

Defects in a web cause problems in subsequent processes. For quality purposes, these defects must be identified and removed. Marked defects alert downstream operators to act, avoiding downtime and ensuring customers receive your best quality product.

Monarch Defect Marker:

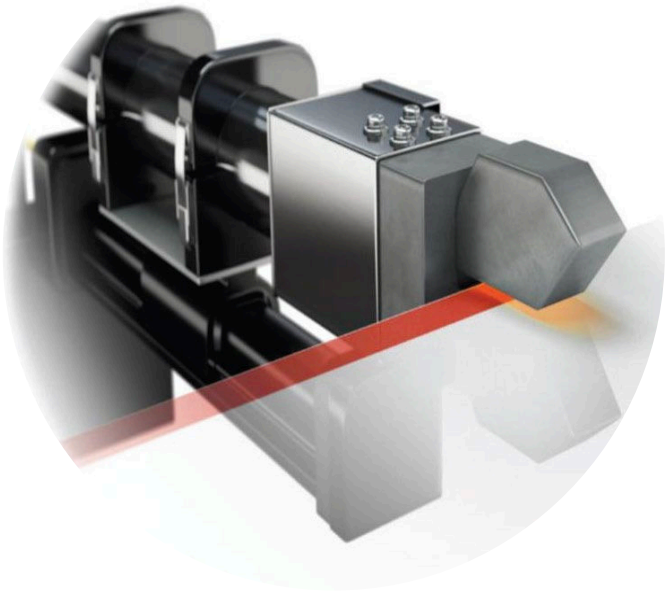

- Places a colored or invisible mark near the defect
- Can be used manually or by machine operators
- Interfaces with any Web Inspection System
- Can be triggered automatically with any process control equipment

Benefits:

- 100% defect-free product
- Eliminate the source of defects
- Reducing downtime from process upsets

Safer work Environment:

- Eliminating the dangerous practice of hand-flagging/marking

Mark Visible on the edge or down lanes of the material.
